Mx GASTRIC CARCINOMA
Main Topic
Antrum
distal gastrectomy
removal of the omentum,
a 3- to 4-cm cuff of duodenum
the subpyloric lymph nodes
Reconstruction
Billroth I or II procedure
linitis plastica
Total gastrectomy with splenectomy
Alimentary continuity
reestablished by a Roux-en-Y esophagojejunostomy
O-G Junction
Upper radical gastrectomy
Esophagogastric anastomosis
Chemotherapy
Epirubacin, cisplatinurn and 5-FU (ECF)
Mitomycin C-impregnated charcoal intraperitonealy
Radiotherapy
palliative treatment of painful bony metastases.
Long-term complications of surgery
Dumping and diarrhoea
Nutritional deficiencies
Postoperative complications of gastrectomy
Leakage of the oesophagojejunostomy
Leakage from the duodenal stump
Biliary peritonitis
Palliative surgery
Roux loop
Gastric exclusion
Oesophagojejunostomy
